Paul,

Here is the email I sent to Steve Ells covering the San Jacinto issues I would like to discuss with you on Monday.

Thanks,

Gary Miller

Subject: USACE Support for San Jacinto Waste Pits Superfund Site

Steve,

I am requesting USACE support through CSTAG for discussion (estimate one conference call for one hour) of construction issues involving the use of engineered barriers to isolate an area that is partially submerged within the San Jacinto River. The area to be isolated would be excavated for off-site disposal and backfilled with clean fill. The barrier would be removed following the work. Some of the issues are: engineered barrier alternatives; their pros/cons; practical depth limits; resistance to storms; time to construct; etc. I would appreciate it if this discussion could take place this week.

Thanks,

Gary Miller
